OSBA Capital Conference
November 11, 2014, 2:00 P.M.
Room C111

William L. Phillis, Executive Director
Ohio Coalition for Equity & Adequacy of School Funding

School choice—A Fiscal Drain on School Districts

I have a long association with OSBA and the Capital Conference. This is my 37th year to make a presentation. Many of you are not that old! I have had the good pleasure of having received the OSBA Presidents Award three times. My respect for the mission of this association of board members is intense and enduring.

School board members represent the fourth branch of government. Those who serve as board members—I salute you. You have chosen to serve school children in the great public common school system. This is the most noble of all public service.

The public common school has been the welcoming gateway to equal opportunity for our nation's children. It has been the flame keeper for the belief in a free and inclusive democratic society that unites us in the common good. It has been the manifest destiny of the poor and marginalized who have come to our shores over the decades.

The public common school system is the only institution, public or private, that has the potential of bringing all the children of all the people together to learn together and become Americans together. If this sounds old-fashioned, out-of-date or anti-reform...so be it. But that is where I am coming from and I salute you as public school board members and school personnel, as guardians of my liberty.

I want to broaden the topic—School Choice—a fiscal drain on school districts-- and discuss it in the larger context of the diminishing role of the common school system in the American education landscape. It hurts me to watch the relentless assault on the common school system. Maybe that is because of my fond memories of the days I spent as a student in the one-room Coffee school, the Winona school and the Highland school, all in United Local School District in Columbiana County; and at Salem High School and The Ohio State University. I have fond memories as a public school teacher, principal, local superintendent, county superintendent, JVS superintendent, assistant superintendent of public instruction, and additionally, in my current role.

My viewpoint on schooling is not welcome in some quarters. Surprisingly, some public school board members and public school employees consider my views much too narrow. By now you know that I am an outspoken advocate of the common school system and take a dim view of tax funds flowing to charters, vouchers and all other private education entities. But you should know that I am a great advocate of private institutions.

For many years I have been serving on the boards of a private university, a private children's home and a private youth camp. I believe wholeheartedly in private institutions that are supported privately.

So on this journey this afternoon we will explore the current state of school funding, the issues regarding the future of school funding, the extent of the drain of choice programs on school districts, and the inefficiencies, ineffectiveness, waste and fraud inherent in the expanding choice movement.

In the October 2014 OSBA *Journal*, the Governor is quoted, "I am a strong supporter of school choice because no child should be trapped in a failing school, public or private, all schools should be held to high standards." I agree that no child should be trapped in a failing school; however, 15 years of charter school experience in Ohio has demonstrated that charters, typically, at best, do less well than traditional schools. Why? There is a correlation between the level of poverty and the success of school districts and charters as measured by the state's rating system; therefore, the effects of poverty must be addressed for the benefit of all students, rather than giving some students in poverty an escape route to, in most cases, a less effective education venue. The issue of poverty should be addressed within the public common school system. Merely allowing some students to escape from a poverty system is nefarious public policy.

I also agree with the Governor that all schools should be held to high standards. Then why do charter schools escape from about 200 statutes, rules and regulations? Why are school choice programs nearly void of transparency and accountability? We will come back to a discussion of the Ohio choice experience later. First, we will address the state of school funding.

The State of School Funding

In the October 2014 OSBA *Journal*, on pages 32-35, Dr. Howard Fleeter provides a school funding outlook for the future. Fleeter's table (Table 1) FY'10 to FY '15 school district formula aid and tangible personal property (TPP) tax replacements is reproduced below. This table shows that the state is providing \$607.3 million less to public school districts this biennium than in the FY '10 and FY '11 biennium. State officials might argue that the FY '10 and FY '11 biennium included \$913.1 million of federal stimulus funds, which is true, but the stimulus money was provided to prop up the basic state aid programs during the recession and thus to avoid laying off school employees. It was a stimulus package to replace the loss of state dollars. The fact is: the school districts of Ohio have \$607.3 million less state foundation funds and TPP tax replacement funds in this biennium than in the FY '10 and FY '11 biennium.

Table 1: FY10-FY15 School District Formula Aid & Tangible Personal Property (TPP) Tax Replacement Payments

(\$ in Millions)

	FY10	FY11	FY12	FY13	FY14	FY15
School District Foundation Aid	\$6,536.8	\$6,514.7	\$6,266.1	\$6,325.6	\$6,609.5	\$7,042.4
JVSD Foundation Aid	\$261.0	\$263.0	\$263.0	\$263.0	\$269.5	\$277.1
<i>Total K-12 Foundation Aid*</i>	<i>\$6,797.8</i>	<i>\$6,777.7</i>	<i>\$6,529.1</i>	<i>\$6,588.6</i>	<i>\$6,879.0</i>	<i>\$7,319.5</i>
	\$13,575.5		\$13,117.7		\$14,198.5	
Business TPP Tax Replacement	\$1,041.4	\$1,052.3	\$728.3	\$482.0	\$482.0	\$482.0
Public Utility TPP Tax Replacement	\$79.9	\$76.8	\$31.6	\$28.0	\$28.0	\$28.0
<i>Total TPP Replacement</i>	<i>\$1,121.3</i>	<i>\$1,129.1</i>	<i>\$759.9</i>	<i>\$510.0</i>	<i>\$510.0</i>	<i>\$510.0</i>
	\$2,250.4		\$1,269.9		\$1,020.0	
Total Foundation Aid & TPP Replacement	\$7,919.0	\$7,906.8	\$7,289.1	\$7,098.6	\$7,398.0	\$7,829.5
Biennial Totals	\$15,825.8		\$14,387.7		\$15,218.5	
Biennial Change			-\$1,438.1		+\$830.8	
FY14-15 vs. FY10-11					-\$607.3	

* Foundation Aid figures include Federal Stimulus funds of \$417.6 million in FY10 and \$515.5 million in FY11.

All data are from the Ohio Legislative Service Commission.

An additional detriment to school district budgets is that the state will deduct from school districts at least \$400 million more for charter schools in this biennium than in the FY '10 and FY '11 biennium; hence, the total loss in net state funding

to school districts in this biennium compared to FY '10 and FY '11 biennium is in excess of \$1 billion. This does not include about \$150 million in annual deductions for vouchers.

In FY 2015, 177 districts remain on the guarantee and are receiving nearly \$120 million in additional funds by virtue of the guarantee. 242 districts, which are subject to the cap, leave on the table about one-half billion dollars by operation of the cap. Hence, two-thirds of Ohio's districts are not "on" the formula. The school foundation formula is not working! That is what the Court said in the 1997 *DeRolph* decision and now nearly two decades later the situation is the same. State officials have disgraced the Ohio Constitution for 17 years by operating an unconstitutional school funding system. A new funding formula and a new funding level are required to achieve a constitutional system.

Table 2 provides a historical view of total school foundation funds and the deductions for charter schools. More than \$7 billion have been deducted from school districts for charters since 1999.

Table 2

	*TOTAL FOUNDATION FUNDING	TOTAL FOUNDATION FUNDING AFTER COMMUNITY SCHOOL DEDUCTION	COMMUNITY SCHOOL DEDUCTION
FY 90	\$2,832,941,541		
FY 91	\$2,945,758,626		
FY 92	\$2,937,792,352		
FY 93	\$3,058,530,975		
FY 94	\$3,068,396,921		
FY 95	\$3,189,596,974		
FY 96	\$3,369,791,323		
FY 97	\$3,477,577,979		
FY 98	\$3,737,739,199		
FY 99	\$4,235,083,815	\$4,224,098,793	(\$10,985,021)
FY 00	\$4,482,790,766	\$4,431,131,863	(\$51,658,903)
FY 01	\$4,831,396,174	\$4,739,511,097	(\$91,885,076)
FY 02	\$5,325,730,297	\$5,186,788,597	(\$138,941,700)
FY 03	\$5,640,649,972	\$5,436,918,552	(\$203,731,419)

FY 05	\$5,956,600,281	\$5,534,864,143	(\$421,736,138)
FY 06	\$6,087,991,590	\$5,606,432,174	(\$481,559,416)
FY 07	\$6,147,709,219	\$5,617,126,761	(\$530,582,458)
FY 08	\$6,457,640,481	\$5,872,711,285	(\$584,929,196)
FY 09	\$6,635,286,811	\$5,988,782,261	(\$646,504,551)
FY 10	\$6,536,792,132	\$5,955,413,984	(\$679,872,827)
FY 11	\$6,514,716,126	\$5,814,841,013	(\$721,951,120)
FY 12	\$6,268,418,459	\$5,740,311,618	(\$774,404,507)
FY 13	\$6,318,597,076	\$5,444,368,975	(\$824,049,484)
FY 14	\$6,599,507,535	\$5,418,096,824	(\$900,500,253)

Source: Ohio Department of Education

What could the school districts have purchased with \$7 billion? 87,500 school buses or 350 new school buildings or 14,000,000 computers or more teachers or lower class sizes or early childhood education programs or Third Grade Guarantee programming.

The trend of an increasing amount of money going to charter schools will continue; hence, the negative effect on school district budgets will be exacerbated. The fact is that the school districts of Ohio are receiving less foundation aid than a decade ago. But more on the charter school industry later.

Let's look to the future of school funding. Obviously the politics of taxation and state policy on vouchers and the charter industry, and even the politics of the 2016 presidential election, will determine the future of school funding. The actual needs of students will be given very limited consideration by those in charge of the Statehouse. The logic of determining the essential learning resources, i.e. the needs of students, costing out those elements and devising a formula and funding level for distribution of funding to districts, is lost on the state officials in control. The cost of providing high quality educational opportunities for all students is greater than the Statehouse folks are willing to appropriate.

Taxes

The Governor has indicated publicly that he wants to rid Ohio of the state income tax. His FY 2016-FY 2017 budget proposal will most assuredly provide a substantial state income tax reduction. Probably he will also attempt to resume the phase out of the TPP tax replacement payment. The battle to even maintain the current level of state funding for school districts will be fierce.

Ohio needs a comprehensive tax policy study to determine fairness and adequacy. But the Governor is bent on eliminating the personal income tax without much regard for how it affects state services or a majority of taxpayers. There will be no tax study—just an arbitrary reduction in income tax rates.

The Ohio income tax came on line in the early 1970s when the state provided only 30 percent of the public school district revenue. Local revenues and a small amount of federal funds made up the other 70 percent. During the past 35 years, the percentage of school district revenues provided by the state has fluctuated between 40 and 45 percent.

Income tax rates have been periodically reduced since the inception of the tax. Reductions were made in the 1980s and 1990s. In recent years, HB 66, in 2005, reduced state income tax rates by 21% over a five-year period and HB 59, in June 2013, reduced rates 10% over three years and beginning with a reduction of 8.5% in 2013.

The graph below shows the Personal Income Tax revenue contributed to the General Revenue Fund (GRF) and the total state GRF revenue from FY 2000 through FY 2014. The income tax revenue has fluctuated substantially due to the economy and the rate changes. The FY 2014 GRF income tax revenue was lower than any other year since FY 2004, except for FY 2009 and FY 2010 during the recession. Historically the income tax revenue has been Ohio's largest single source of state tax revenue. However, in FY 2014, the Ohio sales tax revenue surpassed income tax revenue.

	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Personal Income Tax	\$8,080.4	\$8,115.9	\$8,153.0	\$8,244.1	\$8,521.6	\$9,428.7	\$9,615.7	\$9,714.7	\$9,839.4	\$8,327.9	\$7,890.0	\$8,807.0	\$9,017.2	\$9,856.5	\$8,411.1
Total Major Taxes	\$15,617.8	\$15,649.5	\$15,474.3	\$16,317.9	\$17,737.5	\$19,088.0	\$19,563.4	\$19,468.9	\$19,419.5	\$17,093.7	\$16,233.6	\$17,706.2	\$19,005.2	\$21,015.5	\$20,133.1

Source: Legislative Service Commission Table 1

Some of the Personal Income Tax is distributed to the Local Government Fund. The graph below shows the total Personal Income Tax and Total Major Tax Revenue FY 2000 through FY 2014. The trend, of course, is the same.

	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Personal Income Tax	\$7232.0	\$7263.4	\$7304.1	\$7420.7	\$7696.9	\$8598.9	\$8786.4	\$8885.4	\$9114.7	\$7628.0	\$7247.2	\$8120.3	\$8432.9	\$9507.8	\$8064.5
Total Major Taxes	\$14,757.2	\$14,777.6	\$14,637.9	\$15,124.3	\$16,602.1	\$17,921.5	\$17,896.1	\$17,873.5	\$17,871.3	\$15,582.0	\$14,759.4	\$16,213.9	\$17,523.0	\$19,466.3	\$18,699.8

Source: Legislative Service Commission Table 1a

As the income tax dwindles, relative to total state revenue and state GRF revenue, the state's share of school district revenues will most likely decrease toward the 30 percent level provided during the 1960s and 1970s prior to the income tax enactment. There is no guarantee that the state will enact a fracking tax or make any other changes that will replace all the loss of income tax revenue as it is phased out. The administration's focus will continue the shift of the tax burden to local jurisdictions.

Another concern regarding the shifting of the tax burden for schools is taking place at the local level. Residential and agricultural property taxpayers are picking up a greater share of local school property taxes. According to a study by Howard Fleeter, the percentage of local school revenue provided by Class 1 (residential and agricultural) property revenue was 46.1 in 1975, compared to 53.9 for business property (Class 2). In 2011, Class 1 property provided 69.9% of the local property tax revenue compared to 30.1% provided by Class 2. This shift has been dramatic and has obvious implications for the new property tax levies.

As a side note, the state defendants in *DeRolph*, on April 15, 1997, filed a motion for reconsideration and clarification with the Ohio Supreme Court. One of the questions posed was, "May local property taxes be used as a part of a funding solution?" The Court's response was: "The answer is yes but property taxes can no longer be the primary means of providing the finances for a thorough and efficient system of schools." Unfortunately property tax is still the primary means of support.

Yet another property tax issue is that, in nearly every district, the state deducts more funding per charter school student than the state foundation aid per student. In FY 2014, the average charter school deduction per student was \$7251.63 and the average per student state aid was \$3910.25; hence, several hundred million dollars of local property revenue was used for charter students in FY 2014. See Appendix A for a district-by-district breakout.

One central Ohio district has less than one percent of its students attending charter schools, but loses the equivalent of 15 percent of its state aid for charter students. In some cases, school districts are required to write a check to the state because the districts' deductions are greater than the state foundation aid.

Choice (charters and vouchers): Background, philosophy, promises, policy, implementation and results

The choice movement is an end run around the constitutional provisions for the public common school system in Ohio and other states. This movement somewhat annuls the intent of the thorough and efficient clause of the Ohio Constitution.

Hence, the financial draw for choice programs from districts is only one issue. A greater concern relates to governance, segregation, inefficiencies, financial fraud, lack of accountability and transparency, and democracy.

Background

The common school movement began primarily in New England and marched into the Ohio country, beginning in earnest, in the 1830s. The purpose of the movement was to help ensure that all young people would grow up to be participating citizens. The three R's were emphasized in the early common school but the primary goal was to perpetuate democracy, self-government and the common good.

The movement was not without detractors. Horace Mann wrote in *The Common School Journal For the Year 1840*, Volume II, page 2, "No one can cast the swiftest glance over the field of educational labor, as it existed in this state, three years ago, without discovering dangers, from open and covert attack, from marshalled array and from secret ambush, to be encountered by anyone, who, with sincerity and zeal, should enter it, for the purposes of reforming its abuses; dangers, personal to himself and to the cause of his affections. Not a step could be taken but some adverse interest would be alarmed."

Interestingly, Mann, on page 5 of that *Journal*, connected the movement to patriotism. "A patriot is known by the interest he takes in Common Schools." There is no shortage of detractors today.

Detractors were opposed to the concept of tax support for other people's children; private schools not being eligible for tax support; and taxes, period.

Samuel Lewis, the first Ohio Superintendent of Common Schools (1837-1840) was a crusader for the movement and exercised significant influence on state policies for public education but resigned after three years. The position was abolished until 1853 when legislation, subsequent to the adoption of the 1851 Constitution, established the position of State Commissioner of Common Schools.

The delegates to the Constitutional Convention of 1850-51, in the context of vigorous and protracted debate, coined the "thorough and efficient system of common schools" language which was copied by several other states. (Article VI, section 2)

Article VI, section 2 of the Ohio Constitution, adopted more than 160 years ago, requires the General Assembly to "secure a thorough and efficient system of common schools throughout the state." That thorough and efficient standard, along with the 1912 and 1953 constitutional education amendments, guided state officials as they attempted to improve the common public school system over the years.

After the Ohio Supreme Court ruled in 1997 that "Ohio's elementary and secondary schools are neither thorough nor efficient" some state officials proposed to remove the thorough and efficient clause from the Ohio Constitution. Fast forward to the work of the Education Committee of the Ohio Constitutional Modernization Commission. In April 2014, the Education Committee chair Chad Readler proposed to remove thorough and efficient from the Constitution. The reason: the Court can't rule on school funding issues such as thorough and efficient if there is no standard.

Ohio's constitutional provision requiring a thorough and efficient system is an efficacious standard that must be preserved. However, the choice movement is making an end run around this provision.

Antecedents of the current choice movement

The economist Milton Friedman promoted the idea of vouchers for private schools to replace the public school system as early as 1950. Reagan's education commission produced the research-void report—*Nation at Risk*—in 1983. This report gave impetus to the “anti-government schools” crowd to undermine public confidence in public education.

In 1990, John E. Chubb and Terry M. Moe published the book—*Politics, Markets and America's Schools*—in which they advocate parent-student choice and competition. On page 229 they wrote, “There is nothing in the concept of democracy to require that schools are subject to direct control by school boards, superintendents, central offices, departments of education, or other arms of government. Nor is there anything in the concept of public education to require schools to be governed in this way.” They suggested the “problem” in education will continue until a new system is created. Two decades of choice have proven Chubbs and Moe wrong. Nonetheless, today, the privatization of education crowd is advocating that boards of education are a relic of the past. Reed Hastings of Netflix and his corporate chums are advocates of eliminating boards of education. He apparently believes that wealth and corporate power should trump democracy.

About the same time as the Chubbs and Moe publication, the Sandia Laboratory of the U.S. Department of Energy issued a report of its study of American education. The *Sandia Report* indicated there are problems with the public school system but the system can be fixed. The *Sandia Report* was buried by government officials and the media because it did not support the choice agenda.

President George H. W. Bush, in a speech November 25, 1991 in Columbus, Ohio, advanced his choice agenda by advocating a voucher for every student. His proposal was not supported by the all-elected State Board of Education, at that time, and was largely ignored by the general public. However, Governor George Voinovich appointed a parent choice commission which his friend and political contributor David Brennan chaired. That Brennan-led commission started the choice ball rolling in Ohio.

The Ohio voucher scheme started with the Cleveland Voucher program and has been ratcheted up by five additional voucher plans. The \$10 million charter experiment funded in fiscal year 1999 has escalated to a \$900 million expenditure. In FY 2014, charters and vouchers drained over \$1.05 billion from Ohio public school districts.

Philosophy of choice advocates

There are various philosophical camps within the choice movement. Arguments given for their support of choice are:

- The public system has failed
- Private operations are more effective and efficient than “government” schools
- Private schools and charters provide superior opportunities
- Private and parochial schools are entitled to tax money
- Tax money for education belongs to individuals and not the system
- Competition from private ventures will improve the public system
- The concept of governance by boards of education is outmoded, a relic of yesteryear (This philosophy suggests that communities are either incapable of governing their own schools or have no desire to do so)
- Choice is supreme (even if choice is injurious, adverse and baneful)

All of these arguments are antithetical to the common school system.

Promises

Choice advocates promised improved academic performance, and creative and innovative educational programming. They pledged that charters would serve as a model for traditional public schools. They vouched that the competition of choice programs would improve the traditional schools. They committed to these promises in exchange for freedom from regulations.

For the most part, none of these promises (prophecies) have been fulfilled after nearly two decades of choice experiment in Ohio. In fact, deregulation has prompted a great amount of fiscal fraud and corruption, rapid turnover of teachers and students, low academic results and profiteering in the charter industry. Hence, the promises of exemplary outcomes have instead turned into embarrassing failures for the most part.

The KnowYourCharter.com website allows you to check your school district against the charter schools drawing students from the district. For example, in Athens County, more than 200 students go to charter schools (taking more than \$1.5 million from the school districts), but not one of them is attending a charter school with a higher performance rating than the public schools in their home district.

A caution must be noted regarding the comparison of performance of charters with the traditional public system. State policymakers can rig the rules to make charters look better than the traditional schools. That could then make charters look even more attractive.

Policy

Ohio charter school law is a disaster. The following scenario will demonstrate the absurdity of charter school law in Ohio. A charter school is set up by a for-profit company. The company is off limits to state audits and claims to own all the physical assets that are purchased by public tax money drained from school districts. The for-profit company appoints the charter school board members and enters into a contract with the board. The contract is lopsided in favor of the for-profit company. A non-profit charter school sponsor, approved by the Ohio Department of Education, authorizes the charter school but farms out its duties to a for-profit company 100 miles away. This for-profit company also serves as a treasurer for some of the charter schools for which it serves as the hands-on sponsor. There is no evidence that the sponsor or its designee monitors the charter operation. The non-profit sponsor's duties and responsibilities are ill-defined in law. The non-profit sponsor is not subject to public records requests. The Ohio Department of Education approves the sponsors based on inadequate criteria established in Ohio law. In this scenario, there is an absence of transparency and accountability. The for-profit company, behind a cloak of secrecy, is in charge. The only public element is the money ripped from school districts budgets. This scenario begs several questions:

- Why would state officials enact and maintain such a convoluted arrangement? (Campaign contributions are involved.)
- What public body is held directly accountable for the operation? (None.)
- Can transparency and accountability ever be achieved with the current charter policies? (Never.)
- Why do state officials continue to tolerate this arrangement? (Ongoing campaign contributions.)
- What is required to stop this chicanery? (Grassroots efforts of concerned citizens.)

Compare the above scenario with the public common school arrangement. A community elects a board of education to oversee its schools. The board is accountable to the community. Period.

Implementation and results

The deregulated charter industry has resulted in:

- A plethora of financial fraud, only a fragment of which has been revealed. An example of fraud that has not yet been revealed—A for-profit charter e-school operation has over 600 students enrolled that have not logged in yet this year but the charter is collecting an estimate of \$36.00 per day for each of these students.
- High administrative salaries and relatives on the payroll (nepotism). The former head of an online charter operation was receiving about \$5 million per year plus \$20 million in company stocks. Nearly \$90 million of Ohio school district money went to this company in FY 2014.

- Outlandish rental agreements—one Imagine School Inc. in North Columbus is paying \$4,500 per student this year for rent to a subsidiary company.
- Administrative costs are over the top. An analysis of FY 2012 data indicates that charter administrative costs are twice those of school districts.
- Built in inefficiencies.
- Limited resources assigned to the classrooms. Inordinate marketing and public relations costs. One Northeastern Ohio online school of 600 students paid \$185,000 for marketing and public relations in one year.
- In most cases, charters receive low marks on the state report card.
- Some parents transfer their children from highly rated public schools to low rated charters. An Innovation Ohio analysis showed that seven high performing school districts lost \$10 million to charters.
- Unconscionable profits for low performance online charter schools. See Table 3 and Table 4 for the amount of funding Electronic Classroom Of Tomorrow and Ohio Virtual Academy have received.

To a great extent, the charter industry forces a school district to pay for a disjointed operation over which the district's board of education has no control and cannot reduce its own costs in proportion to the number of students lost to the charter industry.

It took Ohio 75 years to reduce the number of school districts from 3,500 to 613. In less than two decades, the state has added about 400, mostly inefficient, charter units.

Charter boards are not accountable to the public. In many cases they have limited or no authority. There is no state registry of charter board members.

In the Gulen Horizon Science Academy charters, some board members may not even be citizens of the United States. The Gulen schools are associated with Fethullah Gulen, a Turkish Islamic cleric holed up in a compound in Saylorsburg, PA.

The charter movement in Ohio, and to some extent across America, can be summed up in the words of Richard Brodsky, former New York State legislator and senior fellow of the Wagner School, New York University, "The usual participants [in legislative debates about education] have been school boards, parents, unions, the education establishment and the occasional adventurous elected official. Starting a few years ago, and more so now, there are new players in New York. The brawny and outspoken new kid is the hedge fund community."

"What's worse is that huge amounts of public education dollars are involved. It turns out that hedge funds are using taxpayer subsidies to fund the charter school movement. Under President Bill Clinton, a tax break called the "New Markets" tax credit has provided a 39 percent tax break for hedge funds that invest in charter schools in underserved communities."

Richard Brodsky continued, "In the end, the charter school movement challenges the existence of public schools, not just some of its policies. The drive to privatize education is part of a national attack on government and the empowerment of large corporate interests."

A November 3, 2014 *Time Magazine* article by Haley Sweetland Edwards states, "The reform movement today is led not by grassroots activists or union leaders but by Silicon Valley business types and billionaires. It is fought not through ballot boxes or on the floors of hamstrung state legislatures but in closed-door meetings and at courthouses. And it will not be won incrementally, through painstaking compromise with multiple stakeholders, but through sweeping decisions—judicial and otherwise—made possible by the tactical application of vast personal fortunes."

Proposed actions

The public education community can either accept the movement to privatize the public common school as inevitable or can stop that movement in its tracks. Political power and unlimited funds are driving the privatization movement. An overwhelming majority of the American people opposes the movement but is somewhat complacent and not organized. If we believe that, as Article I, section 2 of the Ohio Constitution states, "All political power is inherent in the people," we as public school advocates can save the public common school. Collectively, board members serve the same citizens as the Governor and the legislature.

Board members, public school personnel and other public school advocates, have the usual tools available:

- Reveal the facts at board meetings. KnowYourCharter.com is a good tool. Provide information to the press attending board meetings.

- Inform the public
 - Public meetings
 - Develop district-specific information
 - Mailings to the public
 - Social media
 - Challenge state officials
 - Letters to the editor—meet with reporters and editors
 - Include a unit in the curriculum concerning the efficacy of the public school system
 - Encourage state education organizations, civic associations, local education-related organizations and service clubs to make preservation of the public common school system a high priority
 - **Make this your personal priority**

America's Crusade Against Its Public School Children

Posted: 10/12/2011 7:05 pm EDT | Updated: 10/12/2014 7:59 pm EDT

A specter is haunting America - the privatization of its public schools, and Big Money has entered into an unholy alliance to aid and abet it. Multi-billionaire philanthropists, newspaper moguls, governors, legislators, private investors, hedge fund managers, testing and computer companies are making common cause to hasten the destruction of public schools.

This assault also targets the moral and social vision that inspired the creation of public schools - the belief in a free and inclusive democratic society that unites all of us in a common destiny as we struggle together toward a just society and a better life for ourselves and our children.

Public schools were the welcoming gateway to equal opportunity for our nation's children. The fate of Old Europe with its assigned stations in life, its divinely-appointed places in the order of things, was not to be ours as Americans. Inspired by the stories of Horatio Alger, we would seek our fortune because this was America, the country where dreams came true; the land of promise, where pluck, hard work, and a bit of luck would carry the day.

This was the manifest destiny of the poor and marginalized who came to these shores, and public-school children were ushered into this grand tradition of exalted ideals. The poor and the homeless, the sick and the hungry could lay claim to our help because that is what a great nation did - took care of its own, especially those who through no fault of their own couldn't care for themselves. This was a radiantly humane vision in a dark and indifferent world, a belief that would insure our survival in mutual concern as a compassionate people.

Public schools were the flame-keepers of this national creed enshrined in FDR's New Deal, now under radical assault by corporate America and their neoliberal acolytes who would drag the 99 percent back into the Dark Ages of Social Darwinism, the law of the jungle where might makes right, and the poor and weak go to the wall.

The Gates, Broad, Walton, and Koch Foundations deserve special mention in unleashing Armageddon upon our public schools, all the while preening themselves hypocritically as angels of light. So intent are these Four Horsemen of the Apocalypse in their class warfare against their own country that the sacrifice of millions of public-school children as collateral damage means nothing to them.

But in fairness it must also be said that the depredations they are visiting upon our public schools must be seen within the broader context of the universal misery and devastation they are raining down on America's economy, families, the environment, and even compromising our democracy itself! Their purchase of public officials, the institutions of government and the electoral process with Supreme Court connivance proceeds majestically forward as they silence criticism by lavishing billions in strategically targeted hush money.

Schools should not be about the making of profit or segregating poor and marginalized children. Schools should be about only one thing - teaching children, all children, no matter how poor they are or how poorly they test.

Schools should help children grow both as students and persons, enable them to discover the world and develop their mind, and to train them to think critically to face the world on their own. This should be the only purpose of schools, and the attempt to make a profit off children is obscene beyond words, and only those without shame would stoop to justify it.

Charter schools' discriminatory admissions policy is an affront to this moral vision of what a school should be about. A public school which would welcome only children who test well and turn away everyone else, would never be tolerated by the public, yet charter schools do this routinely, and the public is silent.

Charter schools *are* public schools by accepting public taxes, and no amount of denial or obfuscation can conceal that fact. Charters and the educational philosophy they embody are about one thing only - insuring their continued existence by producing higher test scores than public schools, which, let it be shouted from the rooftops, they fail to accomplish. And where is it emblazoned across the heavens that test scores are the infallible measure of students' future success?

Then there are the politicians who expect quid-pro-quo bribes for services rendered, and charter school officials keen on enriching themselves by engaging in illegal conflicts of interest and shady dealings under investigation by the FBI. We are dealing with an army of profiteers and lobbyists who will concoct any lie, buy any legislature, and stop at nothing to achieve their goals.

Such is the eloquence of money that reason, logic, and morality are as naught when this golden-tongued orator pleads the case of charters before state legislatures. Human nature is weak, and when billions are hanging on the vine of temptation, nature is very weak. State houses around the country see get-rich-quick schemes they cannot resist and make sure

that lack of oversight will give free rein to this Wild West of Charters, and the list keeps growing.

This is a new low for American Big Business in defiling even the hallowed precincts of schools, where children should be getting a real education, not sitting in telemarketer cubicles with Bill Gates' computers, as a return on his investment. This is a nightmare vision of education to come, hatched in the same brain that has already given us standardized testing and Common Core standards, a personal gold mine for him. If the vaunted noblesse oblige of multi-billionaire philanthropists were the genuine article, they would quietly pour forth their abundant largesse upon all the public schools of the nation, with no strings attached!

Instead, they pit their pet charter schools against public-school children, who are made to suffer year after year from the loss of billions annually diverted from their schools to charters.

The moral rot of unchecked influence peddling will continue unabated in this stealth war of charter secrecy against American children. For it is they who will be sacrificed upon the altar of this insatiable Charter School Moloch of Greed, which will glut its limitless appetite for money, power, and lasting control over children without any accountability. In the meantime, it's full steam ahead for these "new reformers" with their hidden agenda for two kinds of education - one for the rulers and one for the ruled in a Standardized America. "Without justice, what else is the State but a great band of robbers," was Augustine's trenchant observation that goes to the heart of our times, and this briefest of chapters in his magisterial work should be mandatory reading for the political class of our country (*The City of God* IV, 4). Congressional hearings into this charter-school juggernaut are America's last hope for dragging this fraud out of the shadows.

CHARTER ACCOUNTABILITY

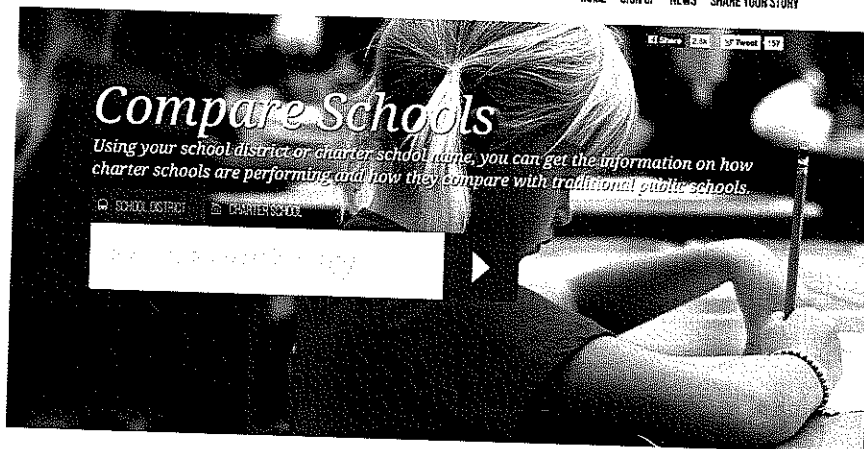

HOW OHIO CHARTER SCHOOLS ARE PERFORMING

HOME SIGN UP NEWS SHARE YOUR STORY

KnowYourCharter.com

A new online tool, KnowYourCharter.com, offers detailed information on how Ohio's charter schools are performing and they compare with traditional public schools. It not only provides access to the state's most recent Report Card information, but improves transparency by aggregating this and other relevant data at a single, easy-to-use website. At KnowYourCharter.com, you can:

- Access data from 18 different spreadsheets for comparison and analysis
- Compare school districts' academic performance with that of area charter schools
- See how much money is being deducted from state aid to public school districts to go to charters

OHIO'S CHARTER SCHOOLS

This new tool is designed to help the citizens of Ohio better understand how publicly-funded charter schools are faring and how they compare to traditional public schools. This website provides data from the Ohio Department of Education on how schools are performing, the percentage of money spent in the classroom, and how much money is deducted from state aid to public school districts and transferred to charter schools. Additional data can also be found by clicking on the name of the district and the name of a charter school.

With nearly 400 charter schools operating in Ohio with less accountability than traditional public schools, it is important that parents, educators and policymakers be able to see the comparative performance of charter schools, as well as what they are costing local school districts.

Ohio's students deserve great public schools whether they are "traditional" schools or taxpayer-funded charter schools. We hope that The Ohio Charter School Accountability Project will provide some of the information necessary for parents, taxpayers and policy makers to make wise and cost-effective choices. Nothing is more important to the future of our state.

District:	Grade 11	State Funding Per Student	% Spent in Classroom	Avg. Teacher Experience	\$ Transferred from District

Your response is appreciated

Contact information

Name _____

School District or other organization _____

Position _____

Address _____

Email (personal) _____

Email (business) _____

Phone _____ Cell phone _____

I want to sign up for daily email message ____ yes ____ no

Is your school district a member of the Ohio Coalition for Equity & Adequacy of School Funding? ____ yes ____ no

I want information about membership ____ yes ____ no

The district was a member in the past ____ yes ____ no

I will help with the following activities. Please check:

- Forward Coalition daily email
- Write, via email/fax/U.S. Mail, my legislators and the Governor
- Personally contact via telephone or visit my legislators and the Governor
- Attend legislative hearings
- Testify before legislative committees and/or State Board of Education
- Spread the "word" via social media
- Discuss the issues with school personnel in my district
- Speak to service clubs and other groups about the issues
- Host a meeting in my school district
- Write letters to the editor
