Safety Plans

Safety Plan Wizard helps you create a comprehensive FEMA-based plan for each school, quickly and easily.

Virtual Binders

Organize and share safety documents from one central location. Eliminate printing costs and improve accuracy.

Floor Plans & Site Plans

Color code rooms and identify life safety equipment throughout each building. Share with first responders.

Safety Drill Logs

Schedule, log, post to your website and track each school's progress. Eliminate spreadsheets.

Flip Charts

Provide staff quick access to step-by-step emergency procedures directly on their smart phone or tablet.

Respond

Empower staff to account for students, by name, during drills & emergencies. Improves speed and accuracy while reducing stress.

“Newtown, like all districts across the country, works diligently with safety officials to provide an optimal environment for teaching and learning. The launch of NaviGate Prepared in all of our schools represents state-of-the-art proactive technology that fits deeply into our district’s safety plan.”

- Dr. Joseph Erardi, Superintendent,
Newtown Public School District

EXPEDITE IMPLEMENTATION WITH ONSITE SERVICE

Take advantage of NaviGate Prepared’s OnSite Implementation Service to get highly detailed floor plans integrated into your system in less time, without detracting from your existing responsibilities or resources.

We will ensure an effective set up by:

- Photographing your selected key areas such as storage areas, labs and mechanical rooms
- Photographing classrooms and other areas using photos and 360° images
- Uploading floor plans
- Color coding rooms and spaces
- Attaching photographs to maps and floor plans
- Attaching icons for your selected shut-off valves and life-safety item locations

INVESTMENT

Option 1 Pricing

Initial Year License \$1,500 Per Building

- Maps & Floor Plans (PDF upload)
- Documents & Virtual Binders
- Drill Logs
- Safety Plans
- FlipChart App
- Respond App

Annual License Renewal* \$1,500 Per Building

Option 2 Pricing

Initial Year License & OnSite Implementation

- Elementary School: \$3,500
(\$1,500 License + \$2,000 OnSite)
- Middle School/Jr. High: \$5,000
(\$1,500 License + \$3,500 OnSite)
- High School/Tech Center: \$6,000
(\$1,500 License + \$4,500 OnSite)

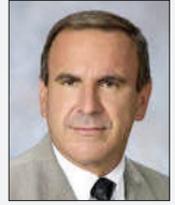

Annual License Renewal* \$1,500 Per Building

**Renewal price subject to change*

Joseph V. Erardi, Jr.

Approaching school safety from a proactive perspective

NaviGate Prepared provides schools with a virtual safety response tool to develop and execute an effective safety program

Joseph V. Erardi Jr. served as superintendent of Newtown Public Schools in Connecticut from 2014 until his retirement in August. During his tenure, the district implemented NaviGate Prepared as a component of a broad safety and security initiative undertaken in the aftermath of the 2012 tragedy there.

Talk about preparation versus prevention when it comes to a school district's safety plan.

The proactive safety plan is a plan that's never complete. From a proactive perspective, time is treasure in a tragedy. For every second you can save, you can save a life. It was our belief that if we could become more efficient with best practices, then that was to everyone's great advantage. We vetted dozens of product software applications and that's how NaviGate Prepared came to Newtown. The software fosters a partnership with local safety officials and allows us to mitigate any lost time if there was an incident or an emergency, in any room or in any building within the school district. That was the reason I felt so strongly about bringing NaviGate Prepared into Newtown.

Talk about the communication needs around an emergency.

NaviGate Prepared allows us to get the best information in the least alarming way to those who need the information the most. If we have an issue with a gas smell in a science lab at the high school, NaviGate Prepared gives a 360-degree view of every classroom. NaviGate Prepared also enables secure text messaging between staff and administrators. This provides critical information during an emergency and can help ensure accurate information is shared with first responders, including the ability to account for nearly 4,500 students by name in any emergency situation across any of the district's nine schools. If the school building needs evacuation, teachers can bring up class rosters on their smartphone or tablet and account for students. Administrators can see who is accounted for and who

is not on their mobile device or computer. Teachers and administrators having this type of critical information at their fingertips can save precious time and help direct response efforts. It allows for the absolute safest approach for those responding to the issue. It's very sophisticated and spot-on.

Did Newtown run safety drills or tabletop simulations?

We probably ran more sophisticated emergency drills than most school districts in the country. We would run tabletop simulations at least three times per year with 40 to 60 people involved, everyone from first responders, town employees, town leaders, school leaders and school staff. We have a very sophisticated emergency preparedness program. I also met with every new staff member so there would be no new staff member who didn't fully understand how to keep themselves or other students in their jurisdiction safe.

While you can't get complacent, does the current safety program, aligned with NaviGate Prepared, offer some peace of mind?

Everybody knows there's no day off with school safety. NaviGate Prepared software allows us a terrific opportunity to record what we're doing, and to learn from how we are doing it, when it comes to our safety plans. When I am looking in the rearview mirror, NaviGate Prepared was the right decision and it will be an ongoing tool for Newtown schools. You never want to get comfortable, but when you do get to put your head to bed, you should believe that you have the absolute best opportunity in place to keep your students and staff safe. NaviGate Prepared allows us to do that.

Drill Scenarios

Turn drills into your greatest school safety asset. Download audio drills or request a free drill scenario deck.

THIS IS A DRILL

You are in the middle of teaching a class when you and several of your students notice smoke and flames coming through the ceiling tiles just over your head.

You may tell the students this is a drill, but be realistic in your response to this situation.
